Turn.It.In—
Turnitin (also known as Turnitin.com) is an Internet-based plagiarism-detection service created by iParadigms, LLC. Institutions, typically universities and high schools, buy licenses to submit essays to the Turnitin website, which checks the documents for plagiarism.
http://www.turnitin.com/

Requirements— Blackboard Vista account, Course Shell, Internet Access

What do you want to do?
I am an Instructor of Record for a University of Houston course. I have a course shell on Blackboard Vista. I would like to use Blackboard Vista to create a Turn.It.In assignment which will check for plagiarism.

Creating a TurnItIn Assignment

1.1
When logged into a Blackboard Vista course,
- Click on the “Build” tab
- Click on the “Add Content-Link” button
- Choose “Turnitin Assignment”
1.2
The window will expand.
- Click on the “Create Turnitin Assignment” button.

1.3
Enter the title of the assignment and click on the “Create Turnitin Assignment” button.

1.4
Choose the “assignment type” by clicking on a radial button and click “Next Step.”
1.5

Enter an “assignment title.”

Enter a “point value.” Point values can exceed 100 points.

Edit the dates specifics:

Start Date = Students are able to submit an assignment once the start date and time has passed.

Due Date = Students will be blocked from submitting papers unless late submissions are enabled.

Post Date = Determines when marked papers or grades will be available for students to view. The post date must come after the due date of an assignment.

Further assignment settings can be found by clicking on “more options.”

Once all settings has been completed, click on the “submit” button (located at the bottom of the page).

1.6

An icon will now be placed within the Blackboard course.
1.7
To view and/or grade assignment submissions, click on the “Teach” tab and click on the Turn.It.In assignment.

1.8
Once assignments are submitted, TurnItIn will display student papers and report plagiarism results. This page will also provide tools to edit or grade the assignment, view class stats, change assignment preferences and more!
