School Leaders: Strong Minds Creating a Vision

January 22, 2015
9:00am - 1:00pm
Hilton, University of Houston
School Leaders: Strong Minds
Creating a Vision
“Strong Minds Discuss Ideas...
Average minds discuss events...
Weak minds discuss people ...”

Socrates
“Strong minds discuss ideas
Average minds discuss events
Weak minds discuss people”

Socrates
Why Are Strong Minds Needed?

- Daniel Yankelovich – *Magic of Dialogue*
  - American society generally makes acceptable decisions

- However, American society is woefully ill-informed
  - Public judgment is based on values and feelings, not knowledge and facts
  - Decisions are the result of protracted public dialogue

- Education is a profession that is all about knowledge and facts
What will strong minds and a focus on ideas accomplish?

- It will stop the practice of largely talking only to yourself and your supporters
- It will encourage and support confronting critics rather than simply reacting
- It will promote participation in the public dialogue and avoid waiting to be invited
- It will incite relevance and shun absence
How To Achieve a Strong Mind

• “a talent for speaking differently, rather than for arguing well, is the chief instrument of cultural change... it is the vocabulary itself which must be addressed ... The method is to redescribe ... things in new ways, until you have created a pattern of linguistic behavior which will tempt the rising generation to adopt it”

Richard Rorty
How To Achieve a Strong Mind

Truth is in the Bias of the Beholder-Bias Blurs Judgment

**Strength to Overcome Bias means you must practice:**

1. Leading with values

2. Driving your points home with fewer rather than greater examples

3. Making your information easy to process

4. Making alternative viewpoints fewer and more easily to come to mind

5. Leaving false information alone
"People can die from the flu."  
Influenza (flu) is a highly infectious disease of the lungs, and it can lead to pneumonia. Each year about 114,000 people in the U.S. are hospitalized and about 36,000 people die because of the flu. Most who die are 65 years and older. But small children less than 2 years old are as likely as those over 65 to have to go to the hospital because of the flu.  

TRUE

"Even if I get flu vaccine, I can still get a mild case of the flu."  
The vaccine usually protects most people from the flu. Sometimes a person who receives flu vaccine can get the flu but will be far less sick than without the vaccine. Flu vaccine will not protect you from other viruses that sometimes feel like the flu.  

TRUE

"The side effects are worse than the flu."  
The worst side effect you’re likely to get with injectable vaccine is a sore arm. The nasal mist flu vaccine might cause nasal congestion, runny nose, sore throat and cough. The risk of a rare allergic reaction is far less than the risk of severe complications from influenza.  

FALSE

"Not everyone can take flu vaccine."  
You might not be able to get this protection if you are allergic to eggs (used in making the vaccine), have ever had a severe reaction to the flu vaccine in the past.  

TRUE

"Only older people need flu vaccine."  
Adults and children with conditions like asthma, diabetes, heart disease, and kidney disease need to get flu vaccine. People who are active and healthy can benefit from the protection the flu vaccine offers.  

FALSE

"You must get a flu vaccine before December."  
Flu vaccine can be given before or during the flu season. While the best time to get flu vaccine is October or November, getting immunized in December or later can still protect you against the flu.  

FALSE

For more information, ask your health care provider or call the CDC IMMUNIZATION HOTLINE. English: 800-232-2522 Spanish: 800-232-0233 Website: www.cdc.gov/nip/flu
How To Achieve a Strong Mind

**Strength to Overcome Bias means you must practice:**
6. Giving just the facts

7. Avoiding lending credibility to myths

8. Talking about solutions and averting creating the crisis
Vision
Beyond Seeing
How To Achieve a Strong Mind

**Strength to Overcome Bias means you must practice:**

6. Giving just the facts

7. Avoiding lending credibility to myths

8. Talking about solutions and averting creating the crisis

9. Telling thematic stories

10. Seeing beyond what is in front of you
Metaphors trump facts

Alzheimer's disease is a progressive disease that destroys memory and other important mental functions. *(Mayo Clinic)*

OR

Alzheimer's disease is like a cat burglar. It slips into a person's life without making a sound, and soon treasured possessions start disappearing: memory, personality and independence. *(Chris Woolston, CONSUMER HEALTH INTERACTIVE)*

Which is better?
Why Strong Minded School Leaders?

• Few Lead – Many Follow
• You have a clear understanding of real issues
• You can define and frame challenges
• You identify and marshal resources
• You make changes that are sustainable
• You recognize those critical moments that draw on your experience
• You avoid being consumed by the discourse of powerlessness
• You have discerned how to incubate new ideas
• You have mastered the skill of circulating testimony in public spheres
• You know how to fashion actionable items
Strong Leaders:

• Spend more time discussing ideas than they discuss events or people
• Speak differently not argue better
  • Lead with values – Talk about Solutions
• State Facts Clearly
• See What is Beyond in Front of Them
• Draw on Their Experience with Confidence
• Avoid the Discourse of Powerlessness
• Are Courageous in Asking the Questions
Be a Daydreamer and Boldly Focus on Ideas

“All men dream: but not equally. Those who dream by night in the dusty recesses of their minds wake in the day to find that it was vanity: but the dreamers of the day are dangerous men, for they may act their dreams with open eyes, to make it possible.”
- T.E. Lawrence
Thank you for the time you gave me today and for the time you give our children every day

My special thanks to the University of Houston/Education
And
Brandie Cleaver, Director of Advancement College of Education
